

Cat Vaccinations

*Feline Combo Vaccination-We use a Non Adjuvanted, reduced-volume vaccination that protects your feline friend from Calicivirus, Panleukopenia, & Feline herpesvirus. Starting at 8 weeks of age, the vaccine requires 3 boosters 3 weeks apart. The 3rd Feline Combo Vaccine Booster is good for 1 year. Then we give the Feline Combo 3 year Vaccination every 3 years after that.

*Feline Purevax Rabies Vaccination-We use a Non Adjuvanted vaccine which starts at 16 weeks of age with a 1 year Rabies Vaccination. Then after that the 3 year vaccination is given and boosted every 3 years. By law, Rabies Vaccination must stay current and the pet must be registered with the county license dept.

*FELV Vaccination (Feline Leukemia Vaccine)-Starting at 13 weeks of age, this vaccine requires 1 booster 3 weeks after the initial injection. Then the vaccination is good for 2 years & will need to be boosted every 2 years after.
